

DO YOU KNOW?

By Rich Krueger

Fitting every home in the U.S. with a solar array would cost LESS than the cost of both wars in Iraq and Afghanistan combined and save the tax payers 162 billion dollars per year?

Recycling one ton of aluminum cans saves 1,665 gallons of gasoline?

Ireland, Denmark, Spain, Portugal, Germany and the United Kingdom all broke records for wind energy in 2013 but the U.S. barely got started.

The world spent 173.5 billion dollars on war in 2012. It would take 135 billion dollars to eradicate poverty.

Nicaragua plans to generate 90% of its energy through renewable resources by 2020. Costa Rica, the greenest country in Central America is currently producing 84% of its energy using renewable resources. Only 11.2 % of U.S. energy is generated from renewable resources?

Do you know that in some areas grocery stores are selling produce organically grown on the roofs of their stores?

What if....Parking structures were covered with solar panels?

Hawaii is in the process of banning plastic bags.

The largest garbage dump on this planet is the Pacific Ocean, specifically the North Pacific Gyre>

We fear Al Qaeda is going to poison our water supplies, yet coal and oil companies have been doing it for generations without and problem.
